## Bulle Clock Serial Number 776

*This unrestored Bulle clock is the earliest serial numbered clock I have acquired. I include these photos just for interest until such time as I can restore it.*

*The base has a shelf rather than a groove for the dome*

*The movement is of the "Boxed Half Plate" type and originally had a 700 Ohm resistor to compensate for the 650 Ohm coil.*

*The card insert dial is in very good condition*

*The fork arbour is broken and the pawl assembly missing. I will have to repair the arbour and manufacture the missing parts. Altogether though a lovely early original clock.*

*See the "[Early Bulle Movements](#)" document in the downloads section for more info on these early Bulles.*

**Bulle Clock Serial Number 776**

*The column is soldered to the collar which attaches it to the base. The locating pins can just be seen in the lower photo.*
